

ELETTRA PRESSED METAL PARTS

Elettra Products has been manufacturing pressed metal products since 1989. Our materials are sourced from Australian owned businesses wherever possible and the steels and non ferrous metals used in the manufacture of our products have been supplied by Melbourne based companies for the past 30 years. This long term supply relationship with reputable companies ensures reliability of supply and quality from start to finish. We offer a full service of design and manufacture of tooling for new products or contract pressing with customers own tools. Our prices include all maintenance such as regular sharpening and minor repairs such as hole punch replacements and tool chips.
